

## Chapter 10: An Evaluation of the Stability and Pharmacokinetics of R-lipoic Acid and R-Dihydrolipoic Acid Dosage Forms in Human Plasma from healthy Human Subjects

David A. Carlson, Karyn L. Young, Sarah J. Fischer & Heinz Ulrich

- I. Introduction: Structure, Stereochemistry and Mechanisms of Action of Alpha Lipoic Acid; page 236
- II. Structure; Physical Properties, Stability and Stereochemistry of Lipoic Acid; page 239
- III. Stability of Dihydrolipoic Acid in vitro and During Sample Preparation; page 240
- IV. Baseline levels of R-Dihydrolipoic Acid in Human Plasma; page 240
- V. Enzymatic Reduction of Alpha Lipoic Acid: Is Dihydrolipoic Acid an in vivo Plasma Metabolite of Alpha Lipoic Acid? ; page 242
- VI. Animal and Human Plasma Pharmacokinetics of rac-Dihydrolipoic Acid; page 246
- VII. Plasma Pharmacokinetics of R-(+)-lipoic Acid in Humans; page 248
- VIII. Materials; page 249
- IX. Analytical Equipment & Methods; page 249
- X. Plasma Collection and Comparison of Anticoagulants; page 250
- XI. Comparisons of High Performance Liquid Chromatography Methods of Analysis; page 251
- XII. Results and discussion: A re-evaluation of the stability of R-Dihydrolipoic Acid; page 252
- XIII. Pharmacokinetics of sodium R-lipoate (NaRLA) versus R-(+)- lipoic acid and R-(-)-Dihydrolipoic Acid; page 254
- XIV. Abbreviations; page 259
- XV. References; 261-270
